

Addison Bartelli

addiebartelli at gmail period commercial | <https://addiebart.net>

Education

University of Kansas | Lawrence, KS

GPA: 3.87

Bachelor of Science in Computer Science | May 2026

Undergraduate Certificate in Cybersecurity

Notable Courses: Database Systems, Software Security, Machine Learning, Cyber Defense

Work Experience

H&R Block | *Software Engineering Intern* | Kansas City, MO | May 2026 – Present

- Shipped an **API** and web interface allowing support agents to safely copy and debug small business tax returns without impacting live data, improving efficiency and reducing reliance on manual intervention.
- Practiced **Agile SDLC** with a global team, creating tasks and reviewing code on assigned stories.
- Updated and pushed the service proxy NuGet package with a new vendor API integration.
- Overhauled a CI/CD pipeline in Azure DevOps to communicate QA release notes to team members.
- Debugged and resolved issues across C# solutions using step-through debugging to verify values.
- Built and refined a support ticket UI and fully mocked the backend for H&R Block's hackathon.
- Led the intern cohort as Social Chair, coordinating carpools and connectivity for 29 interns.

Projects

Git Smart, Hack K-State 2025 | October 2025 – **FIRST PLACE WINNER**

addiebart.net/gitsmart

- Developed the frontend for a gamified Git tutorial/challenge using **Typescript** and **React**.
- Wrote modern CSS styles using **Tailwind** and bundled with other assets via **Vite**.
- Implemented communication with backend using the **WebSocket** API and Regex to capture data.

Music Board, HackUTD 2025 | November 2025

addiebart.net/musicboard

- Created a web application allowing users to rate music albums on a public board.
- Implemented integrations with **PostgreSQL database** and optimized for mobile with **responsive CSS**.
- Integrated with the MusicBrainz API to fetch album data while maintaining access control.

Leadership

Webmaster, Association for Computing Machinery at KU | May 2025 – May 2026

www.kuacm.club

- **Maintained** the website of KU's ACM chapter with schedules using **TypeScript** and Astro.
- Built an "archive" page using **components** to keep record of and access to previous meetings.
- Crafted and presented multiple technical talks at ACM meetings and HackKU, KU's hackathon.

Server Administrator and Co-Founder, KU Minecraft Club | May 2025 – May 2026

- Administered a server to run Minecraft multiplayer, serve web content, and **controlled access**.
- Employed industry tools including **Nginx**, **Systemd**, **Firewalld**, and **TLS security** implementations.
- Planned events to provide positive experiences to **300+ members/users**.

Engineering Chair, Out in Science, Technology, Engineering and Math at KU | Spring 2025 – May 2026

- Worked with Engineering Dept. to create an event for **2000+ students** at the Engineering Exposition.

Skills and Technologies

Programming Languages: TypeScript, JavaScript, Python, C, C++, C#, Java, SQL, Kotlin, Dart, HTML/CSS

Libraries/Frameworks: React, Next.js, Angular, Tailwind, Express.js, Vite, Flutter, Numpy, Pandas, Matplotlib

Technologies: Git, GitHub, Node.js, VSCode, JetBrains, WebSocket, Linux, CI/CD, Networks, MS Office
